

LTE Fiber Optic Cable Installation And Testing Concepts

Course Length

Two Days

Prerequisites

None, however a fundamental understanding of telecommunications transmission principles will be useful for students taking this course. *This course can be customized or combined to meet specific system requirements.*

Course Objective

This course is for technical and non-technical students who are new to fiber optic cable and transmission. This course will cover fiber optic cable types, modes, construction, installation and maintenance and testing. Much of the course is hands-on and will include proper handling, splicing, connector installation, inspection, and performance testing fiber optic cable installation for LTE.

COURSE OUTLINE

Optical Basics

- Background and Industry
- Glass v/s Plastic
- Light Wave Transmission
- Multimode v/s Single Mode
- Standards, specifications and terminology
- Cable Types
- Cable Performance
- Loss and Dispersion
- Understanding Loss Budgeting

Fiber Optic Safety

- Light Sources-LASER & LED
- Dangers of Light transmission
- Dispose of Fiber optic cables

Splicing and Termination

- Connector Types
- Making connections
- Cleaning
- Cleaving
- Mechanical Splicing
- Fusion Splicing

Termination Devices

- Splice trays
- Patch Panels
- Fiber Distribution Hubs
- Optical Bridges
- Optical Splitters

Installation & Testing

- Fiber Test Measurement Guidelines
- Reel Test
- Splicing Installation test, Acceptance
- Fiber Acceptance Criteria
- Receiver Threshold Test
- Non-Service Affecting Maintenance
- Service-Affecting Maintenance

Fiber Test Equipment

- Power Meters - RX
- Handheld Video fiber inspection scope without power meter
- PC based USB fiber inspection
- Visible light sources
- Visual Fault Locator
- Fiber Scope Software Installation

LTE Fiber Optic Cable Installation And Testing Concepts

Loss Testing

- Performing a Reference on a Powermeter and Lightsource
- Setting wavelength on Powermeter and Lightsource
- Installing Fiber Loop on Tower Top
- Raycap/Rosenberger Fiber Distribution Pre-Testing Prep
- Standards, specifications and Terminology
- Raycap/Rosenberger Fiber Distribution Fiber testing Tower Top Procedure
- Ground Test Procedure

Fiber Cleaning

- Use of Alcohol for Cleaning Connector Ferrule
- Alcohol Swabs
- Fiber Distribution Panel Inspection and Cleaning
