# 802.11n/ac Quad Patch Antenna
with RPTNC Plugs (Fits Cisco Co-Locating Mount)

This 2.4/5 GHz 6 dBi directional antenna features four dual-band antennas in a single unit. Each antenna pigtail is dual-band with RPTNC Plugs. This antenna allows wireless engineers to simplify deployments by using only one antenna for dual band access points. Deployment is further simplified by the multiple mounting options: the antenna ships with TerraWave's Universal Articulating Mount (SKU 384807), and the back panel hole patterns are also compatible with TerraWave's Cisco Co-Locating Mount (SKU 568600) (sold separately). *Every TerraWave antenna is covered by the company's two-year TerraNet warranty program. Mounting Bracket Information

Installation Instructions:
1. Place the bracket on the back of the panel antenna. Attach the antenna to the mast.
2. Use the client to test and adjust the receive signal strength (RSSI) and adjust the azimuth and elevation to maximize the RSSI. Tighten each nut and seal the antenna connector.
