

Course Name: Fall Protection

Course Description: This course gives you a basic understanding about OSHA's role in prevention and elimination of work-related illnesses and injuries. The OSHA standard identifies areas or activities where fall protection is needed. It clarifies what an employer must do to provide fall protection for employees, such as identifying and evaluating fall hazards and providing training. Under the standard, employers are able to select fall protection measures compatible with the type of work being performed.

Course Length: 1 hour

Prerequisites: None

Course Content:

- Learn about falls in the workplace
- Identify preventative measures to avoid falls
- Understand the duty to have fall protection
- Identify and understand fall protection systems
- Learn how to develop a fall protection plan
- Learn how to inspect fall protection equipment

Testing:

Quizzes - All quizzes must be passed with a 70% to proceed forward to the next lesson. Final Exam must be passed with a 70% to pass the course.
