SUMMARY

Whether complying with quickly spreading hands-free legislation or improving the ways they use their vehicles for business, today's consumers need an increasing number of communication devices in their vehicles. These include phones, PDAs, laptops, GPS devices, and signal enhancers.

FEATURES

- Hands-free communication
- Location and asset tracking
- Mobile power for consumer electronics
- Mounting and security for laptops, phones, and PDAs
- Signal enhancement

BENEFITS

- Improved communication
- Increased safety
- Secured and protected expensive communications equipment

REAL WORLD EXAMPLES

Situation: A real estate agent works daily from her vehicle.

Problem: Securing her laptop while she is driving and using it when she is not has proved challenging.

Solution: She purchased and installed a laptop mount. It allows her to easily work while the car is stationary and it protects her expensive laptop from damage while she is driving to appointments.

Situation: A company has a fleet of 30 vehicles in use by their traveling sales people.

Problem: The sales team complained of inconsistent cell phone coverage in their territories.

Solution: The fleet manager installed wireless amplifiers in each car, ensuring high-quality voice communications across regions and in areas of poor reception.

Situation: A consumer travels frequently to unfamiliar areas.

Problem: The consumer wastes time being lost, but doesn't want to invest in an in-vehicle GPS system.

Solution: The consumer solved both issues by purchasing a GPS solution that works seamlessly with his Blackberry.

ADDITIONAL CONSIDERATIONS

- What devices are currently being used by the consumer?
- What are the make and model of the vehicle?
- Does the consumer need a temporary or permanent installation?
- Are vehicle wiring diagrams available to help ensure proper installation?

PRODUCTS

- Laptop mounts and accessories
- Power inverters
- GPS and asset tracking devices and accessories
- Wireless amplifiers
- Antennas
- Mobile phone and PDA mounts
- Mobile phone and PDA accessories
- Hands-free car kits
- Bluetooth headsets
- Installation supplies
- Cordless and corded power tools
- Hand tools
