

Course Name: ADSL/ADSL2/ADSL2+ Concepts

Course Overview:

ADSL is changing rapidly to accommodate faster speeds! This course is designed to give the student an understanding of ADSL technologies but focuses on the two newly used ADSL specifications. All equipment and parameters will be discussed and in both the provider and end user locations. Special attention will also be given to basic home networking applications. We will fine-tune the points or products and techniques of particular importance to your operations. Our skilled instructors and staff will tailor the module to meet your requirements.

Course Length: 1 day

Who should attend?

- Telephone Companies
- Power Companies
- Outside Plant Contractors
- Small Business Owners
- Engineers/Planners
- Installers/Technicians
- End Users
