

Course Name: Personal Protective Equipment

Course Description: It is the employers' responsibility to assess the workplace hazards, and if they are present or are likely to be present, and work practice controls alone are not sufficient, then the employer must provide personal protective equipment to the exposed employees. This course gives you a basic understanding about OSHA's role in prevention and elimination of work-related casualties and fatalities, which can be protected through proper personal protective equipment (PPE).

Course Length: 1 hour

Prerequisites: None

Course Content:

- Find out engineering and work practice controls to eliminate or reduce hazards before using PPE
- Understand OSHA requirements related to personal protective equipment (PPE)
- Learn how to protect employees from workplace hazards
- Explore various types of personal protective equipment (PPE)
- Study training and other essential factors associated with personal protective equipment (PPE)

Testing:

Quizzes - All quizzes must be passed with a 70% to proceed forward to the next lesson. Final Exam must be passed with a 70% to pass the course.
